THE MIDLAND.

MIDDLETOWN, N. Y., Sept. 3.—The hoard of Directors of the New York and Oswogo Midland Railroad, have just awarded the contracts for the Middletown division of the road, and the branch of Ellewille made the track. to Ellenville, and also the Showangunk tunnel. It will be seen by this that the Directors are still pushing ahead and nothing stops them. They are the right men in the right place.

Mesers. Guoss and Fenguson from Camida have the contract for building section 10. They have commenced work, and want men and teams.

-On section nine which can be seen from the village, matters are fast progressing, but it needs a nearer view to see how thoroughly and rapidly it is accomplished. The contractor Mr. E. Augs of Oswego Co., is a man-who glories in obstneles which would apparaordinary men. Go ahead is written all over his face, and in every motion. He is the father of Capt. Ames, of the celebrated Ames Battery which told so well during the rebellion .-Mr. Snow of Syrneuze, is the overseer, and what he don't see is not worth speaking about. He has for his force some of the best men on the hill, with their teams and already has a good portion graded and is still pushing along. From the shanty back of Mr. Ponran's can be seen a panoramic of our village which is worth-a good long journey to enjoy, apart from every attention from Messrs. Asses and Sxow. Success to the confractors.

-Persons visiting Mr. FLANAGAN's section in this town, will be surprised to see the amount of work that he and his men have accomplished. I begins to look like a railroad over there. From the woods just beyond where the bower stood on the day of colebration, he has graded from there up to the hop-yard of WM, POINTER. This has been mised all the way about 74 feet, except near where ground was first broken and at the hop-yard. Where ground was first broken, there is a cut of about 12 feet to be made, which is through rock. A small gang of men are now engaged in getting out these stone which are very handsome, for the culveris and cattle-passes, a number of which have been built and they are good specimens of mason work. The deep cut is just through the woods on the land Mr. J. H. Roor, here for over one-half mild the carth will be taken out 100 feet wide at the top and 20 feet at the bottom, and will be 314. their working quarters in winter It will well pay our citizens to visit this section.

The Peak Family Bell Ringers.

The simple announcement that the well-known Peak Family give one of their entertainments at Lewis' Half, Tuesday evening, this loth last, is all that is necessary to insure them a crowded house. Those that have heard them once never fall to go and hear them again.

Lucky, Mr. Dourn Burrow of this fown bought a package of Eureka Smoking Tolacro at the Pettia House a week or two since and on opening it found an order for a Meerschaum pipe. He sent the order and a few days since received the pipe, which is worth quite a sum of money.

GRANT AND COLFAX MEETING.

Marie Marie Marie Land

Levis Hall was filled to lit utmost capacity on Saturday evening, and the earnest spirit and enthusiasm which prevailed, showed that the Republicans of Oxford are waking up to the importance of the pending political contest. The Tanners make their first appearance in public, humbering nearly a hundred torches, and attracting much attention by their novel uniform and orderly bearing. A number of liouses on Clinton-street were illuminated, and presented a cheerful greeting to the Tanners. The principal speech of the evening was made by Chaplain CLARKE, and in the main was and earnest and clear exposition of the principles which divide the two political parties. Therewere parts of the speech which did not preserve that elevated tone, which are due to such an audience, and which if omitted would have added to Its effect. We cannot in fidelity to our position and in justice to the public, approve in one whose earnestness and zeal in behalf of his principles we admire, any course of remark which we would condemn in a political opponent. The bare mention of the good news from Vermont filled the hall with an electric thrill, which found an echo in a thunder of applause. The meeting adjourned to meet at the Hall Friday evening, the 18th inst.

Jorrespondence.—A visit to the Inebriate Asylum at Binghamton.

Binghamton is a charming city for its size, and has full as many pleasant people dwelling in cozy omes, as any other place can reckon upon, but the most beautiful spot when reached, and the one most worthy of attention, is the Inebriate Asylum and its surroundings. True, one end of the structure bears marks of incendiary illuminations a some time, but the remaining part unvisited by fire and those recently completed, are worthy the pride of the State, whose beneficence stops not for costly expenditures when likely to do good.

We could ask no better or more courteous guide than Doctor Bunn, who rested not until we had than Doctor Bunn, who rested not until we had storer or Dressing, (in one bottle.) Every Been everything worthy of notice, though his own Druggist sells it. Price One Dollar. duties must give him full enough of muscular excreise in walking through the long wards and corridors of the Asylum.

Everything about the house either in finishing or furnishing is just the thing, and when I add to this that the Superintendent Dr. ALBERT DAY is the right man in the right place, a man of liberal culture, and of the stamp upon whom you can rely in any and every emergency, a gentleman and a Christian, alive to the weighty responsibility of redeeming and reclaiming the erring and unfortunate victims of strong drink, what need be said?

We found many things to admire, we found some to mystify. Who would suppose that in an Institution devoted to curing inebriates, there would be a necessity for wine vaults in the subterranean regions for storing and perfectly preserving the juice of the grape. Yet Doct. Turner had them built for that purpose, and there they remain tokens of what a corrupt man can do with State funds,-What particular need of a half acre or so of glass roofing for grape culture, or some other culture as needless to the work assigned him ? What became of many wagon loads of goods conveyed from the Asylum to the rail-road, would puzzle any honest person, but dismantled rooms and vacant places in the library fold that somebody is well provided for, however public funds suffered in the replacing of

There are now in this Institution seventy-five men under treatment, all but seven pay their bills or-they are paid by friends, the seven are free patlents, or impatients as the case majabe.

ral kinds, a splendid Gymnasium nearly comple. ted, billiard-room, bowling-alley, reading-room and chapel combined, and the loveliest landscape to be seen from every window that ever mortal eyes looked upon. Where could we find a better place

for sad and fallen humanity? The medical staff numbers only Doct. Day and Doct. Bunn, and the Dispensary or Pharmacy for dealing out medicine was very compact, and well arranged, but in no wise formidable even to those nelined to minute doses of drugs as we were. When those who have charge of the outside adornments complete the work in hand, this spot will to all lookers on, be or seem to be a foretaste of an earthly paradise. Nothing but the ain and folly of intemperance led to its erection, but we believe it destined to rank among the best, and noblest charities of the age, unless it should become so very delightful that men might purposely stray in order to be sent there for safe keeping, "a consumation not to be wished for," and which might convince any one that an ounce of prevention at home was better than the pound of cure, even though ad-

Jan. 13, 1868. I. F. WARD.

[From Rev. 18AAC AIKIN, Alleghang, Pa.] Joseph Fleming, Druggist, No. 84 Market Street, Pittsburg. Sin-I take great pleasure in stating that after having suffered from dyspepsia for about fifteen years, at some periods much more than others. I have been entirely cured by the use of Coe's Dyspepsia Cure. My friends know that of late years my case has been an extreme one. I had great suffering from eating any kind of food, and on an average would romit about one third of my meals, in a sour indigestible mass. When the severe attacks would come, I would lose all strength and be niterly helpless. Some of the attacks would be so severs that for days together, I would not retain anything on my stomach, save a little dry-toast and tea. For-years-I knew not what it was to pass five consecutive bours without intense pain. From the time I took the first dose of this medicine, I ceased time I took the first dose of this medicine, I ceased voniting, gradually all soreness passed away, and flesh and strength returned, and ever since I have been able to eat any kind of food set upon the table. Six months have now passed without any symptoms of the return of the disease. My case was considered by all, even the physicians, so marvelous, that for stime it was feared it might be fectious; but I am now so well convinced, that I have been not merely relieved, but permanently cured, that I can conscientiously recommend Coe's Dyspepsia Cure to all victims of Dyspepsia.
